## ABOUT ME

I am a product designer completing MA Design Products at the Royal College of Art in 2020. A keen maker; I have always had a passion for designing, making and problem solving. I offer a broad range of experiences from engineering, design to event organisation. A passion for sustainability, as well as, a degree in sustainable design inform critical thinking capabilities allowing me to have a broad perspective of sustainable design approaches. As well as my regular tech & design work I provide freelance design and painting, including small scale carpentry work, plastering etc.

---

## TECHNICAL SKILLS

- Strong understanding of sustainable design methods, materials and manufacturing considerations, a grasp on the environmental and sustainability assessments and product life cycle analysis.
- Proficient in the Adobe suite, 3D modeling and rendering software.
- Avid maker with strong visualisation skills.
- Capable leadership skills proven in successful organisation of exhibitions in both the UK and abroad.
- Competent in a workshop environment and tools.
- Good knowledge of cnc production, from router profiling to additive manufacturing and more.

---
